

How to Use the Wireless

Welcome! The following general SSIDs are provided:

- **NLNOG-Day2026**

WPA3 802.1X, 2.4GHz, 5 GHz and 6GHz, various connection types

- **NLNOG-Day2026-open**

WPA3 OWE or open, 2.4 GHz, 5 GHz and 6GHz, dual-stack, event-only

- **eduroam**

2.4 GHz, 5 GHz and 6GHz, dual-stack, event-only

NLNOG-Day2026 connection types

Username / Password	Firewalling	IPv4 / IPv6
nlhog / nlhog guest / guest	event-only <i>Only inbound connections allowed towards your device from the event-network.</i>	IPv6-mostly / NAT64
dualstack / dualstack eventonly / eventonly	event-only <i>Only inbound connections allowed towards your device from the event-network.</i>	Dual-stack IPv4 / IPv6
outboundonly / outboundonly	outbound-only <i>No inbound connections allowed towards your device from the event-network</i>	Dual-stack IPv4 / IPv6
allowany / allowany	None Allow any connection towards your device from the global internet and event-network	Dual-stack IPv4 / IPv6

NLNOG-Day2026 WPA3 settings:

- Phase 1: EAP-TTLS
- Phase 2: PAP

The SHA256 fingerprint of the server's certificate is:

0D:EB:77:ED:48:8E:6D:00:F0:4A:F0:47:0E:51:4A:5B:90:48:F2:AF:78:10:73:58:0E:E2:AB:D8:92:B6:B3:74

The subject CN on the certificate is **radius.eventinfra.org**. It is signed by Let's Encrypt for your convenience, though the fingerprint is the thing to check.

For statistics about the event's network infrastructure see: <https://dashboard.eventinfra.org>
